

Data-driven Disease Management System

Spirocloud

Patient Incentive

Equip patients with Spirohome Personal to remotely their lungs, modify treatments, schedule appointments and encourage patient self-management.

Optimize patient management

Track and sort patient data or archive tasks on a unified platform. Print, export and share data with the tap of a button.

Customizable Software

Select from Spirohome software packages or request customized protocols tailored to your needs.

Secure centralized database

Record, view, transfer and store patient data securely from Spirohome devices on a centralized database.
